

Revolutionizing the Cold Chain

ATA D36—Dry Ice Container

Uses Less Dry Ice

The FAA is becoming more and more stringent on how much dry ice they can allow on a single aircraft.

Because of our leading-edge insulation technology Active CC Boxes' dry ice container significantly reduce the amount of dry ice needed per shipping day.

The Kodiak™ ATA D36 is a unique dry ice container. Due to its super insulation, it requires much less dry ice per day than conventional containers. The Kodiak™ ATA D36 will maintain temperatures below -50°C for up to 5 days based on the amount of dry ice placed in the lid.

Durable Construction

The rugged industry standard ATA style outer-box ensures that you can reuse your Kodiak™ container over 100 times thus reducing your per-shipment costs.

Onboard Data Logger

The available Escort iLog onboard data logger monitors both the external (ambient) temperature as well as the internal payload temperature down to -40°C .

Features:

- ◇ D36—Super-insulated container with extra-insulated lid.
- ◇ Sublimation (dry ice usage) is approx. 5 pounds per day.
- ◇ Full 36 liters of available space for cargo and dry ice.
- ◇ Patented Thermal Shield helps protect payload.
- ◇ No external power source required—unit is completely self-contained
- ◇ Durable, reusable container protects product and addresses environmental issues—no recycling or disposal necessary
- ◇ Available Escort iLog onboard data logger.

Specifications	
Temperature Range	-55° to -22° C (-67° to 10° F)
Hold Time	Based on number of lbs. of dry ice used: approx. 5 lbs/ day
Payload Capacity	36L (1.27 ft3)
Cooling Medium	Dry Ice
Interior Dimensions	44.4 x 30.4 x 26.7 cm (17.5 x 12 x 10.5 in)
Exterior dimensions	65.1 x 53.66 x 53.98 cm (25.63 x 21.13 x 21.25 in)
Weight (Empty)	56 lb (25.4 kg) w/o Dry Ice
