HOUSTON, January 16, 2006 – Donald Pagel, President and CEO of Kodiak Thermal Technologies, Inc., announced today that Brigadier General (Ret) Richard L. Ursone has been elected to Kodiak’s board of directors.

Currently, the Senior Managing Director of BearingPoint, Inc., BG (Ret) Rich Ursone has extensive medical logistics and healthcare operations experience spanning over thirty years of service in the United States Army. At BearingPoint, he has been a contributing member of the Policy Dialogue and Implementation project, an effort by USAID to help shape the environment for health across thirty countries.

Prior to his retirement in 2004, General Ursone most recently served as the Assistant Surgeon General for Force Projection, United States Army Medical Command, responsible for Healthcare Operations, Health Policy, Personnel and Information Management. He has also served as Assistant Surgeon General (ASG) for Force Sustainment, United States Army Medical Command, ASG for Force Sustainment, Commanding General, Europe Regional Medical Command, Command Surgeon, U.S. Army Europe and 7th Army and Lead Agent, TRICARE Europe, and Executive Officer to the Army Surgeon General as well as other commanding positions at Fort Detrick and abroad.

During Operations Desert Shield/Storm, he deployed the battalion to Saudi Arabia and was designated Commander, U.S. Army Medical Materiel Center-Saudi Arabia (USAMMC-SA).

BG Ursone holds a Master of Science degree in Education from the University of Southern California, a Master in Business Administration from Trinity University in Texas and a Master’s in Strategic Resources Management, the Industrial College of the Armed Forces (ICAF), National Defense University.

Mr. Pagel stated, “Kodiak is honored to have a career military man as experienced as General Ursone on our board. He brings with him a rich background with great understanding of the potential application of Kodiak’s technologies in a military setting.”

Kodiak Thermal Technologies, Inc. develops patented reusable cold chain shipping and storage containers for the transportation of temperature-critical products in the medical and industrial chemical industries.
