KODIAK TECHNOLOGIES™ WINS PRESTIGIOUS DUPONT GOLD AWARD

Prestigious Dupont Gold Award

Kodiak has been awarded the Gold Award for packaging design innovation for their Cold Chain Shipping Container, that achieves a five day hold time through the use of vacuum insulated panels, and active temperature control. In conjunction with this award, Kodiak will be receiving some press through several upcoming magazine articles, such as Packaging Digest, Packaging World, Food Engineering, Food and Drug Packaging, and Flexible Packaging magazines, to name a few.

DuPont honored fourteen international packaging innovations at the Fifteenth DuPont Awards August 9, 2002. The ceremony began with a reception at the Hyatt Regency Riverfront hotel, continued with a trolley bus ride through historic Philadelphia, and finished at The Kimmel Center for the Performing Arts.

An eight-member judging panel selected the winners based on degree of innovation; potential impact on industry/consumers; breadth of application; marketing innovation of the packaging product; and impact of the packaging on consumer/industry buying decisions. Awards were presented in Food and Non-Food packaging categories.
